Forecast for Saturday 29 Jun 2024

Weather: The rain may become persistent for a time during the first half of the morning before clearing southeast, with sunny spells developing by midday. The afternoon then looks dry with increasing amounts of sunshine through the afternoon and evening.

Chance of cloud-free hill tops above 700m: Little chance at first but chances improving from mid-morning to be close to 100% by early afternoon

Low cloud and visibility: Periods or persistent cloud 450-600m with patches below at first but cloud breaking and generally lifting above the summits from mid-morning. Away from cloud visibility good falling to several kilometres at times in rain, becoming very good from mid-morning.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Nothing to add.

Forecast for Sunday 30 Jun 2024

Weather: Clear spells through the early hours then some good spells of sunshine through the morning, with just the odd light shower possible. Any showers should die out by mid-afternoon to leave the rest of the dry with sunny, then clear, spells.

Maximum wind: Northwesterly 15-20mph, decreasing 10mph through the afternoon

Chance of cloud-free hill tops above 700m: Close to 100%.

Low cloud and visibility: Patchy cloud possible above 600-750m in any morning showers, otherwise cloud above summits. Away from cloud visibility very good, falling a little at times in showers.

Temperature: **Valleys:** Around plus 5 or 6 Celsius rising to 16 or 17 Celsius
At 700m: Around plus 4 Celsius rising to 9 or 10 Celsius
Freezing level: Above the summits
